

SFEA N1SF Radio Club

Hams share a fascination with communicating. They are from all walks of life and nearly all nations. They communicate by voice, data (computers), Morse code and other exciting ways to make contact with other hams. You never know who you'll run into -- maybe a nurse in France, a neighbor across town, an orbiting Space Shuttle astronaut, or a factory worker in China!

This hobby involves radio and satellite experimentation, building electronic projects, communications, operating contests, and Hamfests. You will also learn electronics, make great friends, participate in radio-related events, improve your operating efficiency, and be involved in the fastest-growing wireless technology in the world.

Regular meetings are held on the second Monday of each month from 11:45 a.m. - 12:30 p.m. Additional meetings may be scheduled based on need and interest.

Membership is \$6 per year. Enrollments will be accepted throughout the year. Please direct questions to Club Officers John A Chubick, 766-4365; Mike Sallee, 766-7854; or SFEA Board Member Kentrica Coleman 735-1648. Please mail form to Corporate South Activities, L-1.
